EXECUTIVE OPERATING MANDATE

When leadership defines its AI position, the organization accelerates.

Teams stop second-guessing what is permissible. Capital moves toward high-conviction initiatives. Internal IT and business units gain the confidence to build and deploy at full speed.

The Alternative to 90 Days of Discovery

Instead of open-ended consulting interviews before you see a single page, we work with two focused weekend turnarounds: hand off your priorities or current draft by 5:00 PM Friday; have an active working instrument on your desk by Monday morning.

MODULAR EXECUTIVE SUITE

One specific deliverable, or the complete executive suite.

Enterprise AI is software. Executive AI is governance. We build or harden three distinct corporate plans:

PLAN 1 **Executive AI Position Plan**

Corporate stance, fiduciary boundaries, capital allocation hurdles, and permitted versus prohibited use cases for the board.

PLAN 2 **Executive AI Operations Plan**

Human-AI operating architecture, value stream mapping, team throughput metrics, and the CIO execution mandate.

PLAN 3 **Executive AI Governance Plan**

Delaware Caremark fiduciary compliance, SEC disclosure posture, EU AI Act conformity, and audit committee guardrails.

PATH 1: THE WORKING STRAW MAN

Build out a structured straw man by Monday morning.

For leadership teams starting from a blank page or stalled in cross-functional committee debate:

Hand Off Priorities by Friday 5:00 PM

Provide your core commercial objectives, tooling footprint, and regulatory sensitivities under mutual NDA before end of business.

On Your Desk by Monday 8:00 AM

Receive a tailored, structured working straw man before the week begins so your executive committee has a concrete position to react to.

Frame In Over the Week

Your leadership team spends the week tailoring, testing, and finalizing specific parameters rather than debating from a blank page.

Michael Magruder
Managing Principal, Magruder & Company

PATH 2: THE HARDENING

The Hardening: Stress-test what you already have.

For leadership teams that have an existing draft deck, memo, or IT proposal scheduled for board delivery:

Adversarial Stress-Testing

We red-team your draft against board pushback, fiduciary liability under Caremark, and CIO boundary friction.

Close Fiduciary & Valuation Gaps

Rebuild weak assumptions with verified benchmarks, EBITDA hurdle rates, and rigorous Quality of Earnings defense.

Board-Ready Defense Brief

Return a hardened revision and board Q&A defense brief by Monday morning, arming you for every director inquiry.

EXECUTIVE INTAKE PROTOCOL

Hand off by Friday 5:00 PM. On your desk Monday morning.

We do not overpromise a permanent policy written overnight. We deliver an active working instrument ready for your leadership team to use all week.

The 1-Page Preparation Checklist

Reach out before 3:00 PM Friday. We immediately provide our 1-page Preparation Checklist and bilateral NDA with the 5 simple items needed to initiate your sprint before end of business.

Inquire at: magruder.co/friday-to-monday or message on LinkedIn.
